ENTERPRISE ADMIN OPERATIONAL MANUAL

VANRITI WhatsApp CMS & Commerce Suite

Complete Architectural Guide, UI/UX Wireframes, Automation Safeguards & Operational Usage Reference for Store Administrators.

Key Capabilities Covered:

- ✓ 3-Column Live Chat & CRM Inbox
- ✓ Broadcaster & Dynamic Template Campaigns
- ✓ Customer 360° Profile & Purchase Ledger
- ✓ Automated Order Tracking & Bot Engine
- ✓ Strict Admin Opt-in Safeguards
- ✓ Meta Cloud API Health & Sync Engine

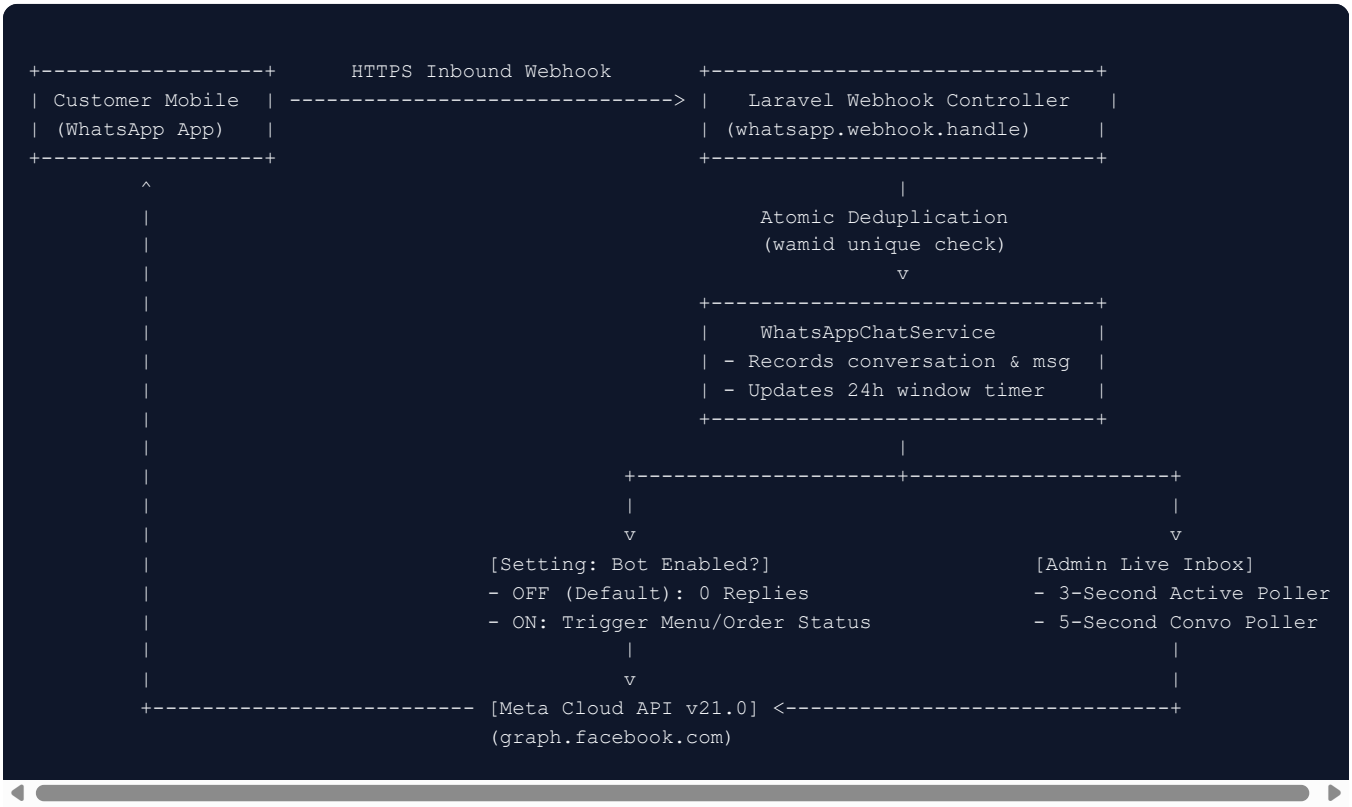

Platform: VANRITI Luxury Fashion E-Commerce **API Version:** Meta Cloud API v21.0 **Date:** October 2026

1 Executive Overview & Core Architecture

The **VANRITI WhatsApp CMS & Commerce Suite** is an enterprise-grade customer engagement and conversational commerce engine natively embedded within the VANRITI Laravel platform. It integrates directly with **Meta Cloud API (v21.0)**, facilitating high-speed bi-directional messaging, rich multimedia broadcasts, automated order fulfillment notifications, and instant customer service.

> **The 24-Hour Customer Care Window Principle**
>
> WhatsApp enforces a strict privacy and anti-spam rule:
>
> - **Within 24 Hours:** When a customer sends an inbound message to VANRITI, a 24-hour service session opens. Staff and bots may exchange *unlimited free-form text, photos, invoices, and audio* with zero per-message Meta template fees.
> - **Outside 24 Hours:** Once the 24-hour timer expires, free-form messaging is locked. Outbound messages must use *pre-approved Meta templates* (Utility, Marketing, or Authentication). Sending an approved template that the user replies to immediately re-opens a brand new 24-hour window.

Architectural Workflow Diagram

2 Live Chat & CRM Inbox (/admin/whatsapp/inbox)

The Live Chat Inbox provides a unified workspace for customer support agents. Built with a responsive 3-column architecture, it allows staff to manage ongoing conversations, view complete customer context, and respond instantly.

```

Key Inbox Features & Tooling

Feature	Functionality	Operational Benefit
Dual Polling Engine	Polls active chat every 3s and conversation directory every 5s silently via JSON endpoints.	Real-time message updates without ever requiring manual page refreshes.
24h Session Tracker	Visual green/red banner calculating exact hours and minutes remaining in customer window.	Prevents accidental failed sends by alerting agent when template is required.
Media Dispatcher	Direct upload for product photos (.jpg, .png), PDF catalogs, audio notes, and MP4 videos.	Enhances customer assistance with visual proofs, lookbooks, and receipts.
Quick-Reply Shortcuts	Type `/` into input box to trigger predefined responses (e.g., `/hours`, `/return`).	Reduces agent response latency by over 80%.
Staff Internal Notes	Yellow sticky-style notes stored in chat history, visible only to team members.	Seamless handoffs between different support shifts.

3 Broadcasts & Campaigns (/admin/whatsapp/campaigns)

The Broadcast Campaign engine allows marketing teams to launch personalized, bulk WhatsApp promotions, seasonal sales announcements, and catalog drops to segmented customer lists.

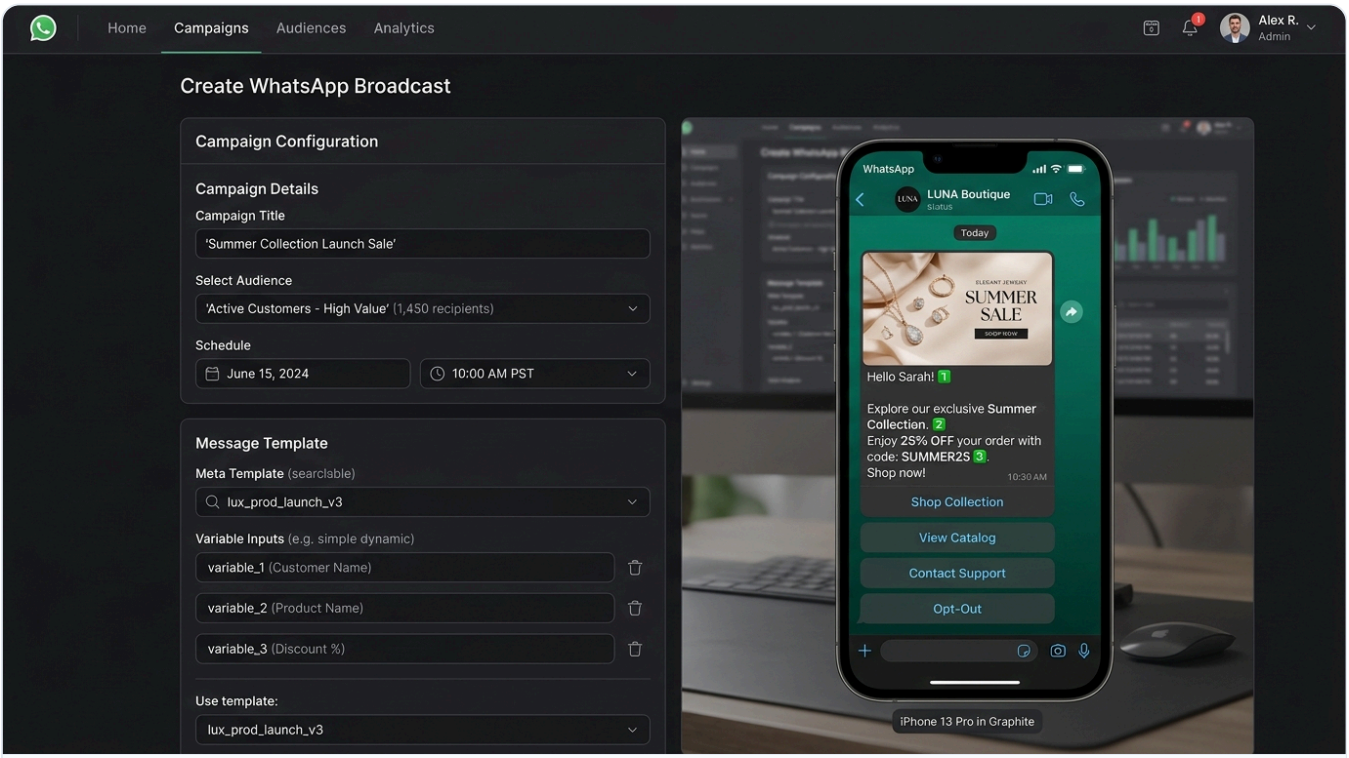

Figure 3.1: Campaign Builder with Live Smartphone Preview & Real-Time Dynamic Parameter Rendering.

|                                                     |  |  +-------------------------------------+  |      |
| 5. Pre-flight Test Send:                            |  |  | [ 🛍️ Shop Collection Now ] (URL Button) |      |
|    [ Enter mobile (+91...) ] -> [ Send Test Bubble ] |  |  | [ 📞 Call Stylist ]       (Call Button)| |      |
|                                                     |  |  +-------------------------------------+  |      |
| [Save as Draft]                [ Launch Broadcast ] |  +-------------------------------------------+      |
+-----------------------------------------------------+-----------------------------------------------------+
```

Step-by-Step Campaign Workflow

1. **Select Meta-Approved Template**
   Choose from synchronized templates. The form dynamically reads template parameters (e.g. `{{1}}`, `{{2}}`) and renders corresponding input fields.

2. **Segment Target Audience**
   Filter recipients: All Registered Customers, VIP High-Spenders, Abandoned Cart Users, or paste a Custom CSV phone list.

3. **Pre-Flight Test Send**
   Enter a test mobile number and click **Send Test**. The system verifies formatting on your device before public dispatch.

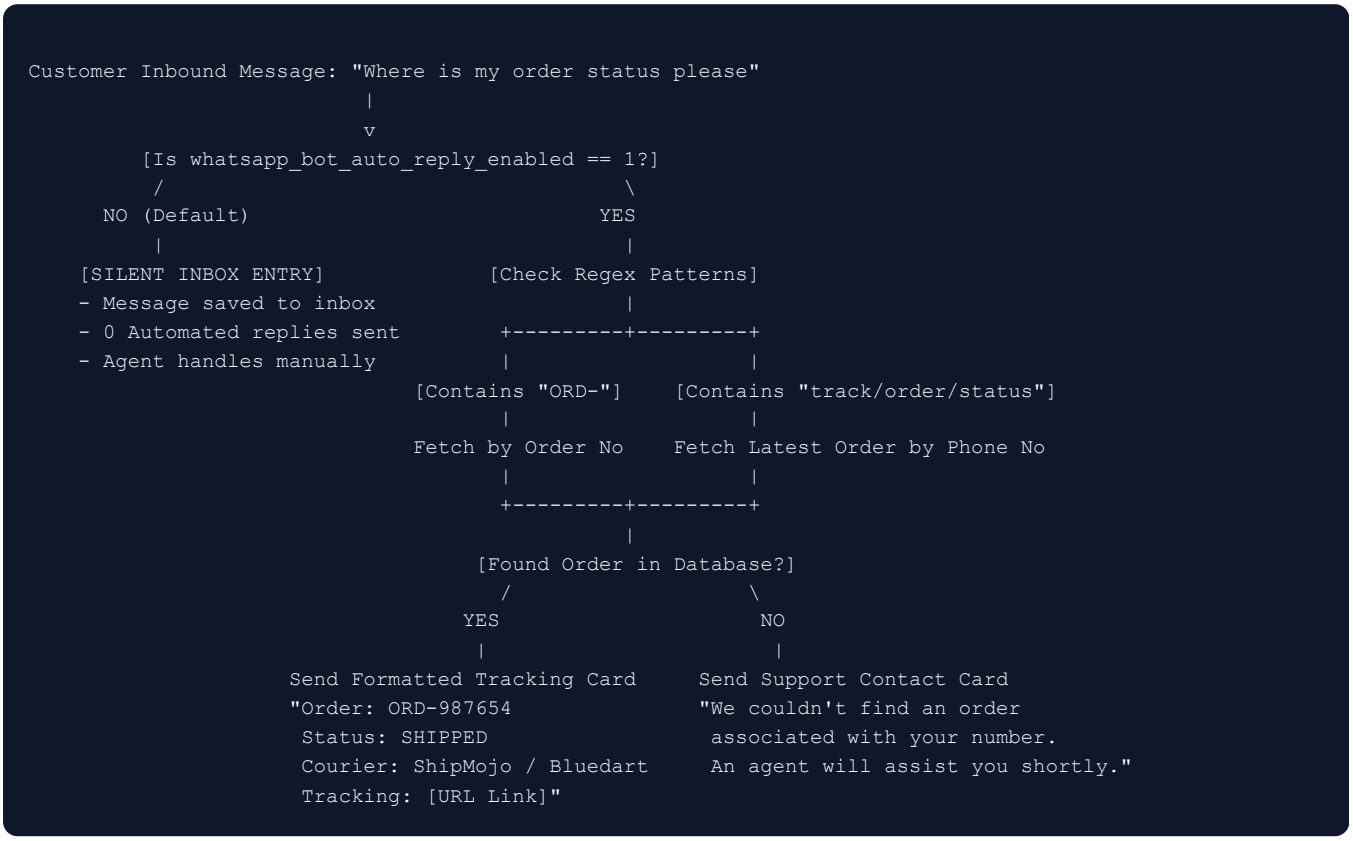

4. **Immediate & Queue-Resilient Dispatch**
   Campaign executes immediately via `ProcessWhatsAppCampaignJob::dispatchSync()` with asynchronous queue fallback, ensuring zero messages get stuck in pending queues.

4 Chatbot Automation & Smart Rules (/admin/whatsapp/bot)

The WhatsApp Bot engine handles customer service routing, instant order tracking, and FAQ self-service around the clock.

> **Strict Admin Opt-In Gating (Default: Disabled)**
>
> To ensure zero unsolicited messages are sent to your customers:
>
> - **Welcome Messages on Register:** Controlled by `whatsapp_auto_welcome_enabled` (Default: `0 / OFF`).
> - **Bot Automated Replies:** Controlled by `whatsapp_bot_auto_reply_enabled` (Default: `0 / OFF`).
> - **Away Messages:** Controlled by `whatsapp_away_message_enabled` (Default: `0 / OFF`).
>
> Automated replies will *never* fire unless explicitly enabled by an administrator in **Admin Settings → WhatsApp Meta API**.

Bot Decision Matrix & Tracking Handler

Automated Bot Rule Configurations

Rule Name	Match Trigger / Keywords	Action Type	Response Content
Welcome Menu	Exact / Contains: `hi`, `hello`, `namaste`, `menu`	Interactive Buttons	3 CTA buttons: *[Track Order]*, *[Browse Catalog]*, *[Talk to Stylist]*

Rule Name	Match Trigger / Keywords	Action Type	Response Content
Order Tracker	Regex: `/(order|track|where is|shipping)/i`	Dynamic Order Query	Extracts latest order status, courier name, and tracking link.
Store Location	Keywords: `store`, `address`, `visit`, `location`	Text + Location Pin	Vanriti Flagship Store address, visiting hours, and Google Maps pin.
Return Policy	Keywords: `return`, `exchange`, `refund`	Rich Text Guide	7-day hassle-free exchange policy instructions with return portal link.

5 Meta Templates & Cloud Sync (/admin/whatsapp/templates)

Meta requires all proactive, outbound messages initiated by businesses outside the 24-hour customer window to follow pre-approved message templates. The Templates dashboard integrates directly with the Meta Graph API.

Template Categories & Permitted Uses

Category	Description & Use Cases	Meta Pricing Tier	Approval Time
UTILITY	Order confirmations, shipping updates, account receipts, payment reminders.	Lowest Cost	Instant to 15 mins (Automated AI review)
MARKETING	Promotional discounts, product announcements, festive greetings, abandoned cart offers.	Standard Marketing Rate	15 mins to 2 hours
AUTHENTICATION	One-Time Passwords (OTP) with zero-tap copy buttons.	Fixed Auth Rate	Near Instant

Template Creation Rulebook

When creating a new template via **Admin → WhatsApp → Templates → New Template**:

- **Header:** Optional. Can be Text (e.g., `Order Confirmed!`) or Media (`Image` / `Document`).
- **Body Parameters:** Use consecutive integers enclosed in curly braces: `Hi {{1}}, your order {{2}} has shipped!`.
- **Buttons:** Up to 3 Quick Reply buttons or 2 Call-to-Action buttons (URL with dynamic redirect or Phone number).
- **Forbidden:** Never include misleading claims or excessive emoji strings; Meta will reject them immediately.

6 WhatsApp Business Profile & Health (/admin/whatsapp/profile)

Monitoring your Meta Business Account health is crucial to avoid sending restrictions and number blocks.

Health Metric	Current Thresholds	Action Required if Degraded
Quality Rating	GREEN (High) YELLOW (Medium) RED (Low)	If rating drops to Red, reduce broadcast volume immediately and review campaign unsubscribes to prevent phone number bans.
Messaging Limit Tier	• Tier 1: 1,000 unique recipients / 24h • Tier 2: 10,000 unique recipients / 24h • Tier 3: 100,000 unique recipients / 24h • Tier 4: Unlimited recipients	Meta automatically upgrades your tier when you send at least 50% of your daily limit with a Green quality rating.

Health Metric	Current Thresholds	Action Required if Degraded
Sync Profile	Direct bi-directional push/pull of Business Name, About, Logo, Email, and Website.	Ensures Meta profile matches current boutique branding at all times.

7 Admin Configuration Master Reference

Navigate to **Admin Panel** → **Settings** → **WhatsApp Meta API** to manage all 20 integration keys:

Configuration Key	Type	Default	Description & Operational Usage
`whatsapp_phone_number_id`	Text	-	Meta Phone Number ID from WhatsApp App Dashboard.
`whatsapp_waba_id`	Text	-	WhatsApp Business Account ID for template syncing.
`whatsapp_access_token`	Password	-	Encrypted System User Permanent Token with `whatsapp_business_messaging` scope.
`whatsapp_auto_welcome_enabled`	Boolean	`0 (OFF)`	Sends welcome WhatsApp template when a new customer registers on the store.
`whatsapp_bot_auto_reply_enabled`	Boolean	`0 (OFF)`	Enables bot to intercept greetings and tracking queries automatically.
`whatsapp_away_message_enabled`	Boolean	`0 (OFF)`	Sends automated out-of-hours notice to customers contacting after hours.
`whatsapp_away_message_text`	Textarea	Default text	Custom message sent when away messages are enabled.
`whatsapp_otp_enabled`	Boolean	`1 (ON)`	Enables WhatsApp OTP for customer login and password resets.
`whatsapp_orders_enabled`	Boolean	`1 (ON)`	Sends instant order confirmation templates on successful checkout.
`whatsapp_shipping_notifications_enabled`	Boolean	`1 (ON)`	Sends automated WhatsApp tracking alerts when orders ship via ShipMojo.
`whatsapp_recovery_enabled`	Boolean	`1 (ON)`	Automated abandoned cart recovery message with instant checkout links.
`whatsapp_recovery_delay_hours`	Number	`2`	Hours to wait after cart abandonment before sending recovery alert.

Configuration Key	Type	Default	Description & Operational Usage
`whatsapp_welcome_template_name`	Text	`welcome_customer`	Meta template slug used for new customer registration greetings.
`whatsapp_order_template_name`	Text	`order_confirmation`	Meta template slug for order confirmation notifications.
`whatsapp_dispatch_template_name`	Text	`order_dispatched`	Meta template slug for shipment dispatch notifications.

Summary of Safeguards Implemented

All automated messaging triggers now respect strict administrator controls:

1. No customer will receive automated greetings unless `whatsapp_auto_welcome_enabled` is toggled ON.
2. No bot menus or automated answers will be dispatched unless `whatsapp_bot_auto_reply_enabled` is toggled ON.
3. Broadcast campaigns dispatch immediately without getting stuck in background queues.
4. All template previews on the campaign creator render dynamically with live variable interpolation.
